

## Patient Symptom Survey Form

Attached is a comprehensive survey form to evaluate an individual's nutritional deficiencies.

The food Americans eat is lacking vital nutrients. Modern technology and a fast-paced world have caused us to increasingly eat on the run, eat too much, and eat unhealthy, highly processed foods laden with sugar and unhealthy type fats. At the same time, Americans don't exercise as much which is leading to an ever increasing number of people who develop serious diseases.

### What can we do?

- First, find out what your body is deficient in and begin a period of healing to rebuild your body
- Supplement daily with a whole food supplement proven to improve health
- Consider the BrainGain Solutions testing and protocol (go to BrainGainSolutions.com)
- Consider a period of cleansing for your body to flush out toxins and waste
- Consider the physical and emotional aspects of your life and address any issues that affect your health.

Use some *“good ole common sense”* and make better lifestyle choices which includes concentrated whole-food supplements, not isolated, synthetically manufactured vitamins.

The attached survey will address vitamin deficiencies, sympathetic and parasympathetic overload, blood sugar stress, cardiovascular health, liver and gallbladder health, digestive stress, thyroid imbalances, pituitary imbalances, adrenal imbalances, as well as male and female hormone imbalances.

### Please read the instructions carefully.
